THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES, WITHIN THE MEANING OF TITLE 18, SECTIONS 793 AND 794, OF THE U.S. CODE, AS AMENDED. ITS TRANSMISSION OR REVELATION OF ITS CONTENTS TO OR RECEIPT BY AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. THE REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

50X1-HUM

All naval ships are supplied with oil from two fuelling stations in Gdynia. Small naval ships and WOP (Frontier Security Guard) ships take oil from the Polmin station located on the northeastern part of the coast (southern pool). The station has one metal cistern, eight meters in diameter, protruding ten meters above the quay level. It is painted dark green (not shadow painting). A hose, six to seven inches in diameter, is attached to the tap (apparently there is only one) and the oil flows through it pressed by its own weight. Larger ships take oil from the Polmin cisterns at Oksywie.
